## Partnership with SUNFIXINGS Ltd unveiled to continue growth trajectory in Europe

**August 6, 2018 - North Andover, Massachusetts** | With over 1.2 gigawatts of flat roof racking deployed around the world and 100 megawatts in Europe alone, PanelClaw® is pleased to announce a new partnership with SUNFIXINGS Ltd for the sale and distribution of PanelClaw's flagship Polar Bear III HD platform in Europe.

This landmark partnership joins one of Europe's most respected racking suppliers and installers with the world's most trusted and cost-effective flat roof racking solution. The agreement gives SUNFIXINGS full access to PanelClaw's supply chain, engineering data, and the most sophisticated and robust software package in the world for ballasting flat roof racking.

"We are thrilled to begin offering PanelClaw's Polar Bear III HD to our partners in Europe. Our partnership with PanelClaw signals a continued commitment to quality," says Cathal Murphy, Managing Director of SUNFIXINGS. "Our customers will now have access to the most reliable flat roof product in the world, backed by a team at SUNFIXINGS that is committed to accelerating the growth of PV throughout Europe."

"We selected SUNFIXINGS because in their team, we found talent that rivals that of ours in the US when it comes to technical knowledge and commitment to quality and service excellence," says Costa Nicolaou, CEO of PanelClaw, Inc. "We continue to look for partnerships around the world to accelerate the adoption of PV through our flat roof offerings."

SUNFIXINGS is now taking orders for Polar Bear III HD in Europe and has already completed projects in the U.K., Netherlands and Poland this year.

### About PanelClaw

With more than 10 years of experience and a complete focus on flat roof racking, we deliver the best service, support and reliability in the world when it comes to flat roof racking.
